## 9 Men Morris Game

Player 2

Fire Wins !

Player 1

### Winning/Losing the Game (No Moves)

When a player is unable to make a move, unable to place a piece and unable to fly a piece, and it is their turn, the other player wins the game.

As shown here, Ice's pieces are blocked in by Fire's pieces, and it is Ice's turn, meaning despite them both having the same number of pieces, Ice loses due to not being able to make a move, or fly due to having more than 3 pieces on the board.

For the winning/losing condition that arises when a player only has 2 pieces remaining, see Winning/Losing the Game (2 Pieces).
